Numb 1.

PUBLICK OCCURRENCES

Both *FORREIGN* and *DOMESTICK*.

Boston, Thursday Sept. 25th. 1690.

IT is designed, that the Country shall be furnished once a month (or if any Glut of Occurrences happen, oftener,) with an Account of such remarkable things as have arrived unto our Notice.

In order hereunto, the Publisher will take what pains he can to obtain a Faithful Relation of all such things: and will particularly make himself beholden to such Persons in Boston whom he knows to have been for their own ease diligent Observers of such matters.

That which is herein proposed, is, First, That Memorable Occurrents of Divine Providence may not be neglected or forgotten, as they too often are. Secondly, That people every where may better understand the Circumstances of Publique Affairs, both abroad and at home; which may not only direct their Thoughts at all times, but at some times also to assist their Rulerships and Negotiations.

Thirdly, That some thing may be done towards the Curing, or at least the Charming of that Spirit of Lying, which prevails amongst us, wherefore nothing shall be entered, but what we have reason to believe is true, repairing to the best fountains for our Information. And when there appears any material mistake in any thing that is collected, it shall be corrected in the next.

Moreover, the Publisher of these Occurrences is willing to engage, that whereas, there are many False Reports, maliciously made, and spread among us, if any well-minded person will be at the pains to trace any such false Report so far as to find out and Conwill the First Raiser of it, he will in this Paper (unless just Advice be given to the contrary) expose the Name of such person, as A malitious Raiser of a false Report. It is Supposed that none will dislike this Proposal, but such as intend to be guilty of so villanous a Crime.

THE Christianized *Indians* in some parts of *Plimouth*, have newly appointed a day of Thanksgiving to God for his Mercy in supplying their extream and pinching Necessities under their late want of Corn, & for His giving them now a prospect of a very *Comfortable Harvest*. Their Example may be worth Mentioning.

'Tis observed by the Husbandmen, that tho' the With-draw of so great a strength from them, as what is in the Forces lately gone for *Canada*; make them think it almost impossible for them to get well through the Affairs of their Husbandry at this time of the year, yet the Season has been so unusually favourable that they have not any want of the many hundreds of hands, that are gone from them; which is looked upon as a Merciful Providence.

While the barbarous *Indians* were lurking about *Chelmsford*, there were missing about the beginning of this month a couple of Children belonging to a man of that Town, one of them aged about eleven, the other aged about nine years, both of them supposed to be fallen into the hands of the *Indians*.

A very *Tragical Accident* happened at *Weston*, the beginning of this Month. An *Old man*, that was of somewhat a silent and Morose Temper, but one that had long enjoyed the reputation of a *Sober* and a *Good Man*, having newly buried his Wife, the Devil took advantage of the Melancholy which he thereupon fell into, his Wives discretion and industry had long been the support of his Family, and he seemed surprized with an importunate fear that he should now come to want before he dyed, though he had very careful friends to look after him who kept a strict eye upon him, least he should do himself any harm. But one evening straying from them into the Cow-house, they there quickly followed him, found him *hanging by a Rope*, which they had used to tye their Calves withal, he was dead with his feet near touching the Ground.

Epidemical *Fevers* and *Agues* grow very common, in some parts of the Country, whereof, tho' many dye not, yet they are sorely unfitted for their employments; but in some parts a more *malignant Fever* seems to prevail in such sort that it usually gives theo' a Family where it comes, and proves *Mortal* unto many.

The *Small-pox* which has been raging in *Boston*, after a manner very Extraordinary is now very much abated. It is thought that far more have been sick of it then were visited with it, when it raged so much twelve years ago, nevertheless it has not been so Mortal. The number of them that have

"I Count."

"How are, father? and the dark eyes looked up inquisitively, and the white face quivered as she spoke. "I cannot sympathize with your complaint; I cannot count Time Myers. I do understand, father, that I am under contract with you, and I am willing to fulfill my part of the agreement, but I cannot count Time Myers. I do understand, father, that I am under contract with you, and I am willing to fulfill my part of the agreement, but I cannot count Time Myers.

"Why, Miss Chloe, don't you know I shall, when there's the spring lady in town, Miss Irene that Mrs. Van engaged to Dr. Jim Chic, and that Dick Chichester engaged to Bishop Mr. Clifton of late engaged and the

"Oh, poor fellow! why should he be asked Eric and Chloe, of Pacific Creek, if he would confine of an Indian and other gentleman in Augusta Mr. Wayne's character for he is a well-known gentleman, I do confess he would disgrace with the company exhibited. But I could see him. I shall see him soon again and I have put him on for special observation in search of pretext."

Then after Chloe's departure she sat and mused.

"Poor Father would you, Miss Eric?"

"Oh! I had almost forgotten. But here I will let him in a few minutes."

Eric's majesty, but stood for Jim's looks determination to speak the stone, inside door of her father.

"Good afternoon Sir!" I am sorry to have kept you waiting. I'm in from a neural pain, father. What is it for work?"

"Miss—Miss, child. Physician established to become the wife of Victor Wayne?"

"Father, I I am not Kennedy, I love to marry you don't though, but I am perhaps Victor Wayne."

"Then you must become home."

"Father, would I—would you follow me into the store in Pacific Creek where? Oh, father, a pale face Quaker lady's presently there now you, and that fine is Mr. Eric, father! Do my angel mother's love."

A last ray to that pearl opals was, but by this had entered all and that love was Eric's smile.

"Well, papa, Sir, that love makes me thankful of marriage—how you living herself."

"Chloe, Miss, I—

Brown face he and walking hand his as spoke again

"Yes, Miss Chloe, who is the exercise of your hand."

"Do not be angry, father, and I will you."

"I will ask you, why?"

"Cause Mr. Wayne, father."

"What!" withered the indignant you—"Sir, unaccustomed ear, you?"

"Did you think you with father had been a saint, and I, Mrs. Chloe, brethren, but in an advent of and my every name—because that I innocently be a popular Miss's education to be a saint, father you'll read, and Mr. Wayne, you'll read, and Mr. Wayne, you'll read, and Mr. Wayne,

Publick Occurrences

...and I'll look down, and whisper "no."
They had a choice, all of them. They could have followed in the footsteps of good men like my father, or President Truman.
Decent men who believed in a day's work for a day's pay.
Instead they followed the droppings of lechers and communists and didn't realize that the trail led over a precipice until it was too late.
Don't tell me they didn't have a choice.
Now the whole world stands on the brink, staring down into bloody hell, all those liberals and intellectuals and smooth-talkers...
...and all of a sudden, nobody can think of anything to say.
HMM.
THAT'S QUITE A DROP.

Chamber falls into disrepair

Fort Myers asked to sell site so it can be fixed up

BY ALISON KEPNER
akepner@news-press.com

Packing tape holds up ceiling tile in one office, but the room looks better than others at the Greater Fort Myers Chamber of Commerce.

Broken windows are boarded up with plywood in a back conference room. Floor tiles — inside and on the front walk — are missing. Throughout the building, brown spots mark the roof's many leaks.

"I don't know what's growing up there," Executive Director Marietta Mudgett said as she pointed to a discolored wall. "I'm afraid to find out."

After years of neglected maintenance, the 51-year-old city-owned building is in serious disrepair. Officials estimate renovations will cost $369,000 on a waterfront property appraised at $410,000.

Chamber officials do not want to spend that much money on someone else's building. City officials, who already are strapped with a laundry list of other deteriorating buildings, do not know where they would get the money for repairs.

That's why chamber officials want Fort Myers to sell the building to the group. Mudgett said she has pledges for about $150,000 and plans a capital campaign to raise the rest of the money for the repairs — if the chamber can buy the building.

Biotechnology seen as boon to FGCU, Southwest Florida

BY DAVID E. PLAZAS
dplazas@news-press.com

Marilyn Cruz-Alvarez's fascination with broccoli and cauliflower could revolutionize the world.

The Florida Gulf Coast University assistant professor is working on switching genes in the vegetables that could let farmers grow them all year long.

"It will be like a little contribution — something that can be used to help agriculture, improve crops and human nutrition," Cruz-Alvarez said.

Meet biotechnology.

The term has excited business leaders and educators anew ever since The Scripps Research Institute agreed to open a research facility and graduate school this summer in Palm Beach County.

The Florida Legislature in October approved $310 million to bring Scripps to Florida after months of negotiation between Scripps and Gov. Jeb Bush's administration.

The private nonprofit institute, based in La Jolla, Calif., specializes in biomedical research and has a history of pumping millions of dollars into its community and state thanks to the jobs it provides and the biomedical and pharmaceutical companies it attracts.

Lee County might not benefit directly from Scripps, but news of its coming has persuaded local officials that riding the company's coattails could bring in big money.

Biotechnology is the use of living organisms to improve the way people live, said Randall Alberte, FGCU's biotechnology program director. That includes new drugs that treat multiple sclerosis and bread engineered to last a week outside the refrigerator without molding.

Yet biotechnology is still largely untested, and that concerns environmental groups such as the National Resources Defense Council.

The council is a nonprofit group made up of lawyers, scientists and environmental specialists out of Washington, D.C., New York, Los Angeles and San Francisco.

"One of the biggest dangers is we don't know any of the consequences," said Kidd Dorn, a council spokesman. "Whenever

Mars rover set to roll off lander

The Associated Press

PASADENA, CALIF. — NASA's Spirit rover has fully unfolded itself and stretched up to its full 4-foot, 11-inch height, making it ready to drive off the lander that delivered it to Mars, the space agency said Saturday.

The rover could reach the Martian surface as early as Wednesday morning.

"It now stands at full height, and all six wheels are in their final position," mission manager Jennifer Trosper said during a news conference at NASA's Jet Propulsion Laboratory.

The unfolding was one of the most complex deployments ever performed by a robotic spacecraft, mechanical systems engineer Chris Voorhees said. NASA had to fold up the 384-pound rover to make it fit inside the lander, which opened up like a four-petal flower.

When Spirit does leave the lander, it will take a different route than scientists had hoped. Air bags used to cushion the rover's landing are now blocking the ramp NASA had planned to use. Instead, Spirit will turn 120 degrees to its right and take a second, more risky ramp to the ground, mission manager Matt Wallace said.

Even though it remains on its lander, 16 inches above the Martian surface, Spirit already has found traces of minerals that could have formed in what might have been an ancient lake at the landing site.

Older Girl Scout troops get makeover

'Studio 2B' throws out the rulebook and gives teenagers more control of activities

BY JENNIFER BOOTH REED
jreed@news-press.com

When members don't want to admit they're part of an organization, it's time for an image makeover.

Girl Scouts of the USA leaders watched their teenage ranks dwindle and their remaining members go underground — scouting is just something not discussed in image-obsessed middle and high schools.

Armed with lots of research and input from girls, scouting officials decided to do something extreme.

Forget the badges, the regular meetings, the uniforms and the rulebooks. Forget even the name.

The teen scouts can now be part of "Studio 2B."

Single Column Grid

The typographic grid is a proportional regulator for composition, tables, pictures, etc. It is a formal programme to accommodate a unknown items. The typographic grid is a proportional regulator for composition, tables, pictures, etc. It is a formal programme to accommodate a unknown items.

Grid systems

A grid can be simple or complex, specific or generic, tightly defined or loosely interpreted. Typographic grids are all about control. They establish a system for arranging content within the space of page, screen, or built environment. Designed in response to the internal pressures of content (text, image, data) and the outer edge or frame (page, screen, window), an effective grid is not a rigid formula but a flexible and resilient structure, a skeleton that moves in concert with the muscular mass of content. Grids belong to the technological framework of typography, from the concrete modularity of letterpress to the ubiquitous rulers, guides, and coordinate systems of graphics applications. Although software generates illusions of smooth curves and continuous tones, every digital image or mark is constructed—ultimately—from a grid of neatly bounded blocks. The ubiquitous language of the gui (graphical user interface) creates a gridded space in which windows overlay windows. In addition to their place in the background of design production, grids have become explicit theoretical tools. Avant-garde designers in the 1920s and 1930s exposed the mechanical grid of letterpress, bringing it to the polemical surface of the page. In Switzerland after World War
