CONTRAST IS ALWAYS IMPORTANT

BUT TOO
MUCH
CONTRAST...

...IS TOUGH TO READ.

Bitmap Images

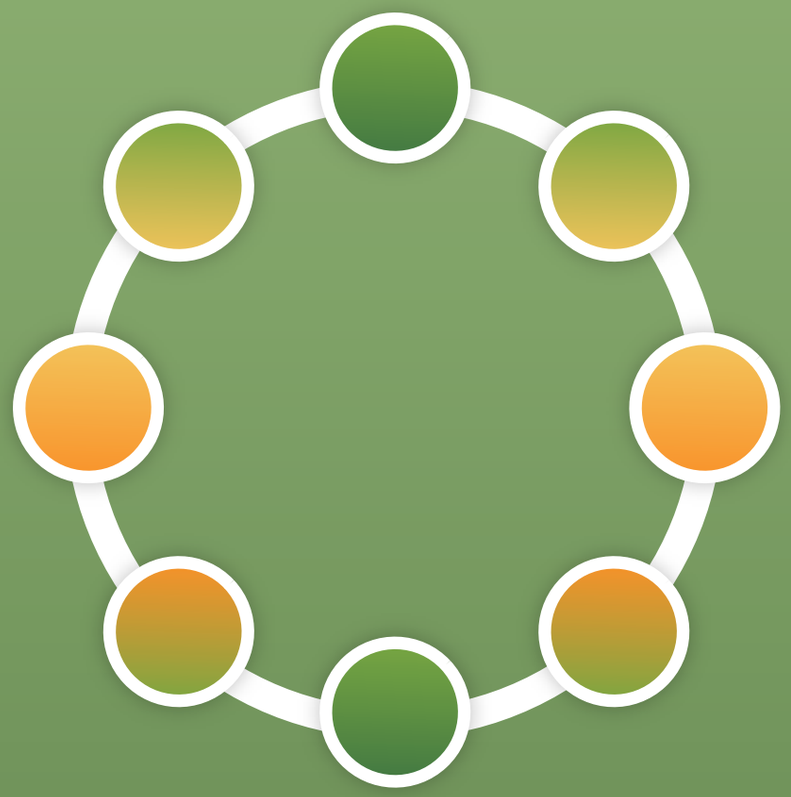

- A bitmap image is made of individual pixels. As the image is scaled up (larger) quality decreases rapidly. Edges become jagged and the image appears blocky or unnatural.

- Photos are the most common kind of Bitmap Image.
- JPG, PNG and GIF are all examples of Bitmap Images.

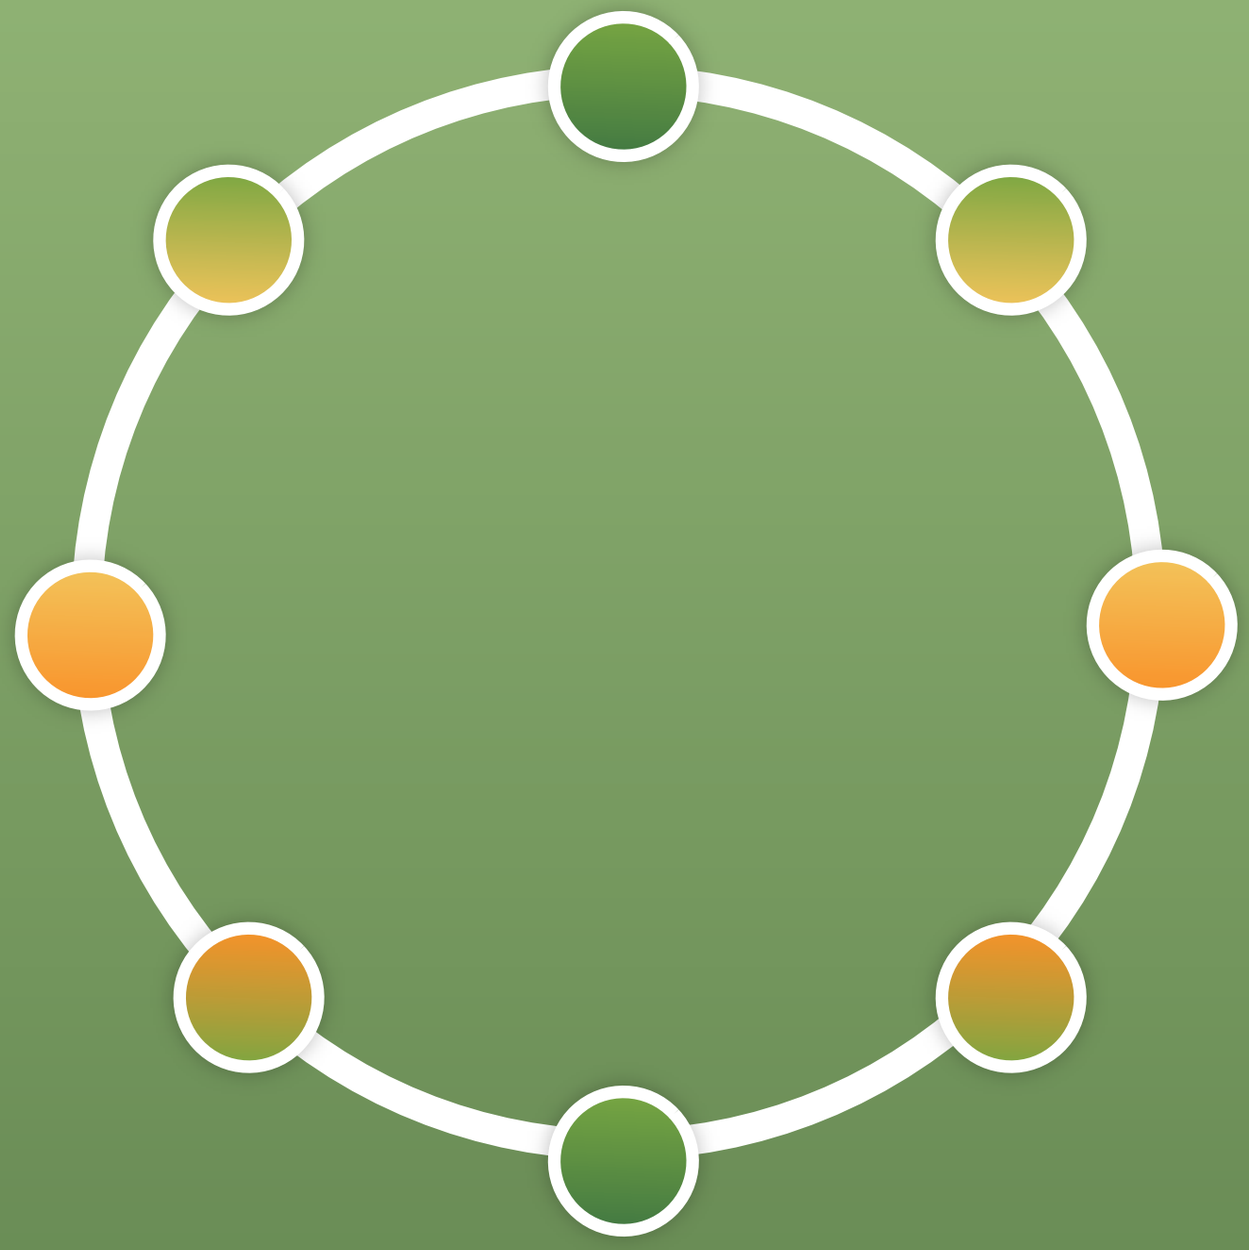

Flash journalism: how to create multimedia news packages, Mindy McAdams

Bitmap Images

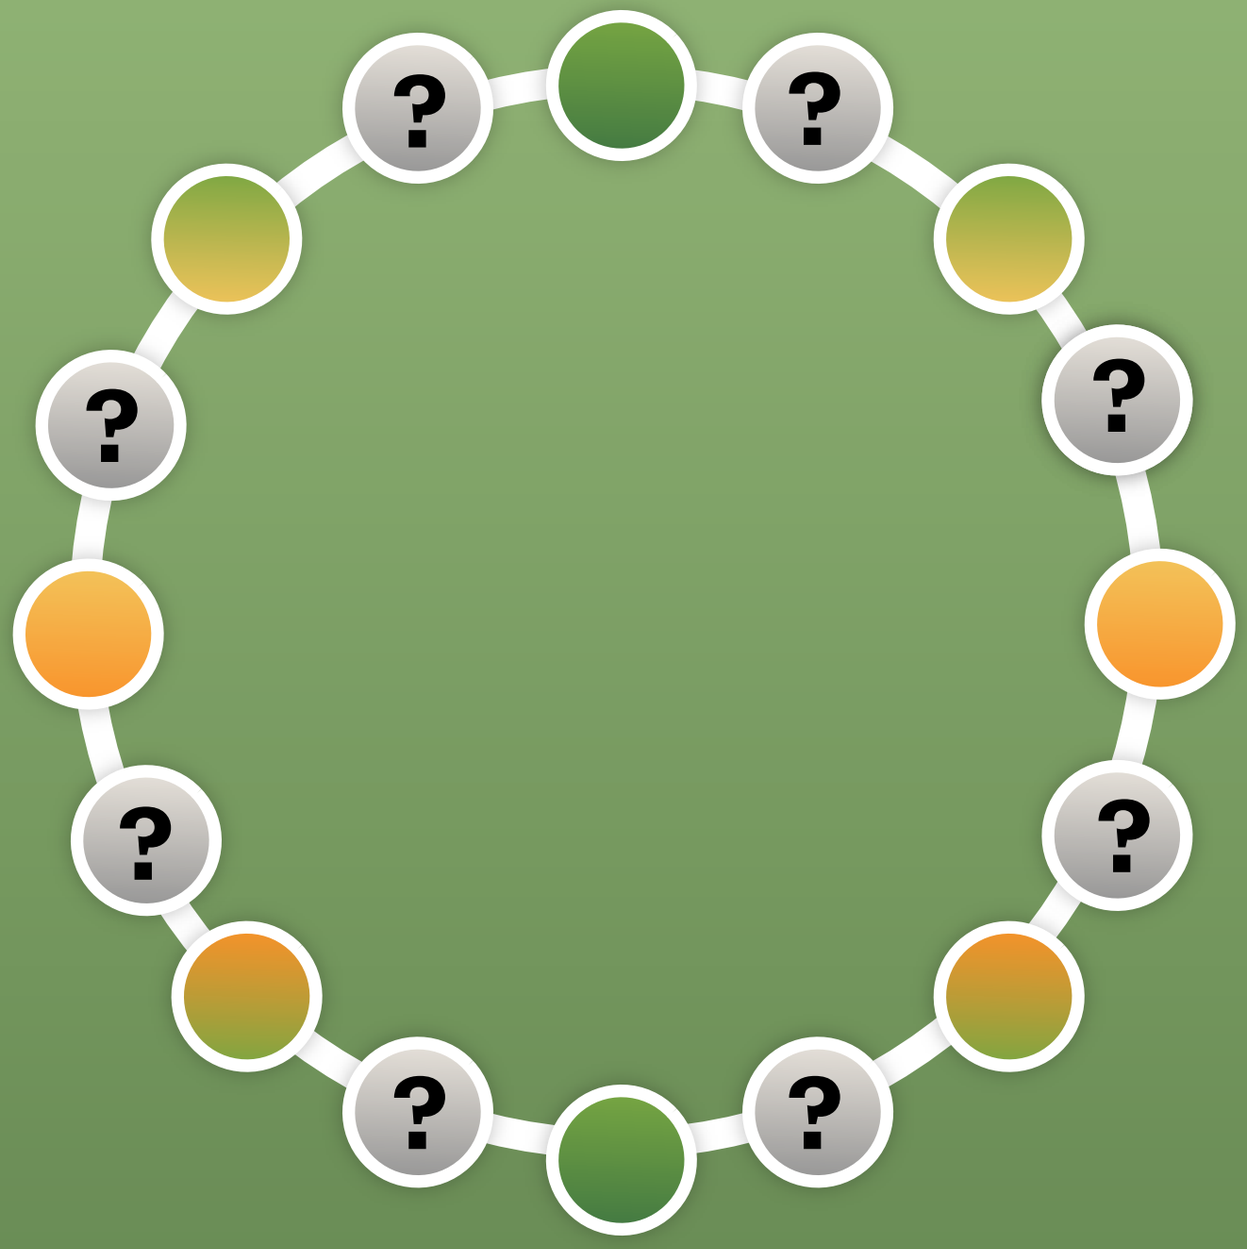

Bitmap Images

Bitmap Images

Vector Images

- A vector image can be scaled (made larger or smaller) with no difference in quality. Lines stay smooth and colors solid.

- Animations and Informational Graphics are often Vector Images.
- SWF (Flash exports), SVG and EPS graphics are examples of Vector Images.
